

Excessive Heat Events Guidebook in Brief

EPA 430-B-06-006 | June 2006

Quick Tips for Responding to Excessive Heat Events

For the Public

Do

- ► Use air conditioners or spend time in air-conditioned locations such as malls and libraries
- Use portable electric fans to exhaust hot air from rooms or draw in cooler air
- ► Take a cool bath or shower
- ► Minimize direct exposure to the sun
- ► Stay hydrated regularly drink water or other nonalcoholic fluids
- ► Eat light, cool, easy-to-digest foods such as fruit or salads
- ► Wear loose fitting, light-colored clothes
- ► Check on older, sick, or frail people who may need help responding to the heat
- ► Know the symptoms of excessive heat exposure and the appropriate responses.

Don't

- ► Direct the flow of portable electric fans toward yourself when room temperature is hotter than 90°F
- Leave children and pets alone in cars for any amount of time
- Drink alcohol to try to stay cool
- ► Eat heavy, hot, or hard-to-digest foods
- ► Wear heavy, dark clothing.

Useful Community Interventions

For Public Officials

Send a clear public message

► Communicate that EHEs are dangerous and conditions can be life-threatening. In the event of conflicting environmental safety recommendations, emphasize that health protection should be the first priority.

Inform the public of anticipated EHE conditions

- ► When will EHE conditions be dangerous?
- ► How long will EHE conditions last?
- ► How hot will it FEEL at specific times during the day (e.g., 8 A.M., 12 P.M., 4 P.M., 8 P.M.)?

Assist those at greatest risk

- ► Assess locations with vulnerable populations, such as nursing homes and public housing
- Staff additional emergency medical personnel to address the anticipated increase in demand
- ► Shift/expand homeless intervention services to cover daytime hours
- ► Open cooling centers to offer relief for people without air conditioning and urge the public to use them.

Provide access to additional sources of information

- ► Provide toll-free numbers and Web site addresses for heat exposure symptoms and responses
- ► Open hotlines to report concerns about individuals who may be at risk
- ► Coordinate broadcasts of EHE response information in newspapers and on television and radio.
